INVESTMENT INTERIOR COLLECTIONS

INVESTA creates imaginative and inspired Interiors for investment to fit both your timeline and budget.

Our tailored Interior Collections have been crafted by our creative team to complement a diverse range of interior finishes.

From an initial consultation to the extensive property survey, rigorous attention is given to the finer details.

Every project is professionally managed, each installation bearing testament to the integrity and quality of both the developer and ourselves.

The result – a unique interior that will positively differentiate your property in a competitive market, reducing void durations and helping to achieve the highest rental yields.

WHY FURNISH?

The end goal when buying an investment property is to maximise your return on investment with the minimum amount of risk. Professionally furnishing your property is the best way to do this.

When buying a new build property tenants are paying for convenience. They choose to view properties with immediate lifestyle appeal – the most attractively presented in their preferred location.

Avoid void periods by presenting your property furnished to a level which meets the expectations of your desired calibre of tenant whilst complementing the lifestyle the development offers.
